

What can I do with a degree in Philosophy?

Philosophy.

Career planning: what do I need to know?

Knowledge of yourself is important for career decision making. Start by looking at your personal goals, abilities, values and interests to explore study and career options that are relevant to you. Some of these may change over time, so it is important to self-reflect and evaluate your career on an ongoing basis.

What do employers look for?

Many employers look for generic skills such as communication, customer-focus, bicultural competence, cultural awareness and teamwork. With technology and globalisation changing the nature of society, skills such as resilience, problem solving and adaptability are valuable at work as well as in life.

How can I develop these skills?

- Some skills are developed through your degree

- Extra-curricular activities can help, for example getting involved in clubs, mentoring, cultural groups, part-time work or volunteering
- Be open to professional and personal development opportunities. Whether it is undertaking an internship, overseas exchange, skills seminar, or joining an industry group — these activities will enhance your employability.

What else should I know?

The career options in this brochure are examples only and the list is not exhaustive. Some careers may require further study beyond a first degree or additional work experience. Some pathways and degrees have a recommended school background. Find more subject details at

📄 www.canterbury.ac.nz/subjects/phil

If this brochure does not answer your questions, talking to an expert such as a career consultant can help you to identify the next steps in your career decision making journey.

What is Philosophy?

Questions studied in UC Philosophy classes include: Are killer drones immoral? What about genetic engineering? Should rich countries give substantially more in overseas aid? Are there objective moral truths? Does God exist? Could we survive death as computer uploads? What is consciousness? Can machines think? What is the difference between science and myth? Why do we enjoy art? Is time travel possible?

Philosophy teaches you how to think about such questions rationally, carefully and clearly. These skills are of real value in the workplace, and also when dealing with more theoretical aspects of other disciplines, including professional subjects such as Law, Nursing, and even Engineering.

UC Philosophy offers Bioethics courses for students in Arts, Criminal Justice, Health Sciences, Science and other degree subjects.

AT A GLANCE

#1

Philosophy students gain the highest GRE scores in verbal reasoning and analytical writing*

\$10–
30k+

scholarships of course fees available for high school teacher trainees**

What skills have UC graduates gained?

Through their Philosophy degree, graduates develop a valuable set of skills that are transferable to a range of careers. These skills include:

- Careful, rational, systematic and clear analysis
- Thinking critically, creatively and challenging ideas
- Logic and reasoning
- Research and computing skills
- Problem solving skills
- Interpretive and analytical thinking
- Understanding the role of ethics
- Effective persuasive oral and written skills.

Opportunities to apply your learning outside the classroom are available in this major. Undertaking an internship, for example, can deepen your skillset, awareness of others, working knowledge, and employability.

Where have UC graduates been employed?

Philosophy graduates are employed in a wide variety of sectors, including for example:

- Technology companies
- Government agencies
- Healthcare

- Education and training
- Legal services
- Finance and insurance
- Manufacturing and retail sectors.

New Zealand organisations that have hired humanities graduates with problem solving and critical thinking skills include:

- Public sector bodies such as the Ministry of Education, the Government Communications Security Bureau, and the Ministry of Business, Innovation and Employment
- Private organisations such as Vodafone, Microsoft and Kraft Heinz
- Digital technologies such as UC Arts Digital Lab
- Not-for-profit organisations such as Fairtrade Australia and New Zealand.

UC Philosophy graduates have landed roles in various universities, government organisations, a music company, law firms, recruitment agencies, technology companies, the retail trade, and private tutoring services. Some of these graduates have even set up their own business.

Internationally, Philosophy is recognised as excellent preparation for medical, business and law graduate schools. With growing business buy-in to concepts of global citizenship, and corporate social responsibility, opportunities for graduates with an ethics background are wide.

* 2016 GRE examination in over 30 disciplines, a worldwide graduate school and business school examination

** 2021 TeachNZ scholarships
www.teachnz.govt.nz/scholarships

What jobs and activities do graduates do?

Graduates with this degree are employed in a range of jobs — see some examples below.

Note: Some of the jobs listed may require postgraduate study. See the 'Further study' section.

Policy analyst / advisor

- Identifies issues and opportunities eg, in society, law or governance
- Interprets and consults on existing policies
- Prepares reports and recommends changes

Tertiary lecturer

- Prepares and gives lectures and tutorials
- Sets and marks assignments and exams
- Conducts research, writes and publishes articles

Artificial intelligence (AI) researcher

- Specifies and writes AI code
- Designs prototype robots
- Markets AI systems to customers eg, banks, hospitals, the military

Ethicist

- Trains people in professional ethics
- Promotes ethics and embeds frameworks within an organisation eg, police, hospitals

Marketing officer, sales manager

- Collects and analyses market insight
- Prepares and implements marketing plans
- Works with others to promote goods or services

Operations manager

- Helps develop strategies and business plans
- Manages standards and business relationships

- Structures resources to deliver services or goods on time and to budget

Research analyst / advisor / assistant

- Organises and conducts research surveys
- Tests theories and interprets the results
- Writes reports and makes recommendations

Human resources / recruitment advisor

- Understands a business's personnel needs
- Advertises vacancies and recruits staff
- Advises on workplace policies and procedures

Secondary school teacher

- Plans and delivers instructional lessons
- Evaluates performance and provides feedback
- Sets and marks assignments and tests

Entrepreneur & self-employment

Entrepreneurship and innovation are an increasing part of the working landscape. Through generating a business idea, or getting involved in a start-up/business venture, you have the potential to create a work opportunity that aligns with your knowledge, skills, values and risk profile. To get started on how to establish, run and grow a new business, go to Te Pokapū Rakahinonga, Centre for Entrepreneurship at the University of Canterbury www.canterbury.ac.nz/uce

What professional organisations can I engage with?

Connecting with professional bodies and organisations can help you to establish professional networks and learn more about different career options in your area of interest. Gaining valuable insight into a profession can assist in making informed career decisions.

- New Zealand Society for Legal and Social Philosophy www.nzlsp.wordpress.com
- Australasian Association of Philosophy www.aap.org.au
- International Association for Critical Realism www.criticalrealismblog.blogspot.co.nz
- New Zealand Association for Philosophy Teachers www.nzapt.net

Having a professional presence on social media networks such as www.linkedin.com and Facebook can help you to keep up to date with important industry developments and trends, networking opportunities, events and job vacancies. Following relevant professional bodies, organisations, companies and thought leaders is a great way to gain a deeper awareness of the industries that interest you. Social media presents an opportunity to build and enhance networks as well as to display your involvement in projects and any academic successes.

Why do further study and what are my options?

Postgraduate study can facilitate career benefits such as specialist skills, entry into a specific occupation, and advanced research capability. It is important to determine which, if any, further study will help you in your future career.

Philosophy graduates can progress from honours through to PhD level. Many train in ethics, teaching, journalism, policy, librarianship, diplomacy or management. www.canterbury.ac.nz/courses

Rory

Bachelor of Science in Philosophy and Statistics Bachelor of Arts in English and Psychology
Currently studying a Masters of Teaching and Learning

Why did you choose Philosophy?

My degree contains a mix of Arts and Science subjects and the skills and ideas learned in one course give you a different way of looking at topics in another.

Out of all my courses, Philosophy is the one I'm most passionate about. The courses on offer are extremely diverse and the assignments allow for students to research whatever niche they're into. It's one subject that's never boring.

What are your career goals?

Something teaching or education-related, maybe in secondary or maybe in tertiary. For now, I hope to be a high school teacher, ideally teaching philosophy but I'll happily teach English and mathematics until a philosophy teaching role opens up.

Why the interest in teaching?

I've had a real mix of teachers throughout my schooling – some brilliant and some rubbish – which has shown me the huge benefits that an effective teacher can bring to a class. I would not have got to where I am now without some of my teachers, so I hope one day to 'pay it forward' through my own teaching practice.

How are you working towards your goal while studying?

I work as a teacher aide for a class at Hagley College to help students who are struggling by breaking tasks down into smaller components and work through them step-by-step. The best part of my job is being able to help the more capable students to go beyond the minimum requirements and produce some quality work.

What advice would you give to someone considering Philosophy?

Do it. Philosophy has a reputation of being too far removed from real-life to be of any practical benefit, but this simply isn't true. Philosophy teaches you to view the world critically and analytically, which is a skill that can be applied to a range of academic and vocational settings.
